Norylux™

(modified polyphenylene oxide)

Norylux modified PPO is a strong engineering plastic with outstanding mechanical, thermal, and electrical properties. Low moisture absorption and low thermal expansion make Norylux one of the most dimensionally stable thermoplastics available. Norylux is widely used for electrical housings and structural components since it has excellent insulating properties, flame resistance, and dimensional stability over a wide range of service temperatures. Norylux is often selected for fluid handling applications since it has low moisture absorption and excellent strength and stiffness. Norylux is easy to fabricate, paint, and glue.

The following physical property information is based on typical values of the base modified polyphenylene oxide resin.

	Units	ASTM Test	EN-265	30% GF
Mechanical				
Flexural Modulus	psi	D790	370,000	830,000
Flexural Strength @yield	psi	D790	14,400	22,000
Hardness-Rockwell	_	D785	R119	L106
Izod Impact Strength				
Notched @-40°F	ft•lbs/in	D256	2.5	1.8
Notched @73°F	ft•lbs/in	D256	3.5	2.0

Norylux Manifold

Applications Include:

- Manifolds
- Pump, valve, and fitting applications
- Scientific and analytical instrument components
- Housings
- Covers
- · Electrical components

Advantages of Norylux:

- Excellent dimensional stability
- Low moisture absorption
- Good strength and stiffness over a wide range of service temperatures
- Good impact resistance
- High dielectric strength
- Easy to fabricate, paint, and glue
- Excellent flammability rating (UL94 V-1 @ .058" thick)

Manufacturing Capabilities:

Rod: 1/8" to 8" diameter **Sheet:** .030" to 6" thick **Film:** .005" to .029" thick

Colors/Grades:

Black (standard) Glass-filled (gray)

(custom colors available)

FDA compliant grades available on a custom basis

*In addition to our standard capabilities, Westlake also has the ability to process custom resins in various sizes and colors with some exceptions.
